Thanks Jessica. We'll keep the Trustees involved as this (cap repair & borrow pit location) moves forward.

Later,

Gary Miller, P.E.

Hi Gary,

I am sorry I didn't get a chance to return your call today. I've been on a series of conference calls and need to work on some comments for draft Brine RI WP and SAP. The short answer is that yes, the trustees are very interested in coordinating on the actions taken in that wetland area since we would want to discourage causing damage to the wetlands for remedial actions and want to look for opportunities to increase the ecological value of that property (ex. turn a borrow pit into a pond or wetland).

I can't think of any specific guidance on this except for the permitting required by COE for impacts to wetlands (filling or removing them).

I'll be in the office tomorrow and will look for you to talk about this further.

jessica
